the **CENTER**

- Trover Wound Healing and Hyperbaric Center is a full service wound care clinic caring for patients with non-healing wounds.
- Located within Regional Medical Center, our center is operated with a strong commitment to optimal patient care. This mission is attained through the application of state-of-the-art technology, continuous quality improvement, patient and family education and an achievement of superior patient outcomes.

the **STAFF**

- Physicians and nurses with specialized training in wound care and hyperbaric oxygen are available to care for patients who are referred to the center.
- The staff attends educational courses designated by the Undersea and Hyperbaric Medical Society as well as advanced wound care seminars, conferences and classes on new products and treatments.
- The medical directors and attending medical staff of Trover Wound Healing and Hyperbaric Center are board certified in Thoracic and Vascular Surgery, Family Practice, and Podiatric Medicine with consultations by Plastic Surgery and Orthopedics.

the **CARE**

- On admission to our center, our physician does an initial evaluation, assesses the patient's physical condition, obtains a medical history and performs a thorough wound evaluation.
- Clinical practice guidelines are available for consistency, with the medical staff's individual knowledge, clinical experience and specific expertise used to effectively respond to each individual patient's unique presentation.
- Weekly photographs and measurements are taken of all wounds and patients are seen when the individual plan of care indicates (i.e., daily, weekly, etc.)
- The patient's plan of care is determined by a multidisciplinary team and is discussed with the patient and family with emphasis on education, nutrition, and the patient's physical and medical needs.
- The center provides ongoing communication with the referring healthcare providers during the period of the patient's treatment in the center.
